

FIRM PROFILE

Commitment to elegant designs, superior personal service, and environmental stewardship has long characterized the work of Towers|Golde. Each project, each client or user, and each site inspires us to generate unique and innovative solutions that produce dynamic places of beauty and sustainability, enduring quality, and humanity.

In 1997 the American Society of Landscape Architects honored the firm with its most prestigious Award of Excellence, national recognition of the firm's long history of achievement in landscape architectural design. We have also received more than 50 state, national, and international awards for completed projects. Towers|Golde's consistent pursuit of design integrity, professionalism, and continuity of service continues to elicit exciting and challenging projects.

As a mid-sized firm of landscape architects, T|G is ideally suited to serve our clients with responsive, personal attention. For over forty years we have collaborated with many of the country's outstanding architects and planners. We routinely assemble project teams to meet the needs of a broad range of project scales. At least one partner is intimately involved in each project, drawing on the unusual breadth of expertise, creativity and passion of the design talent within the studio.

A LIMITED LIABILITY COMPANY

DESIGN PHILOSOPHY

Towers|Golde does not have a 'style'. Our designs are specific to the client, the site, and the larger physical and cultural context, whether that is ecological, architectural, historical or institutional. By carefully interweaving environmental character and architectural aesthetic, we unite site and structure with apparent effortlessness to create memorable spaces of distinctive character that enrich the daily lives of individuals and their communities.

Our practice is founded on skillful analysis of landscape conditions, sensitivity to architectural mission and issues of scale, commitment to the principles of sustainable design, and unusual respect for client concerns. We are dedicated to an inclusive, collaborative design process that serves art and stewardship as well as budget and function.

In the belief that variety fosters creativity, the firm maintains a portfolio that is diverse in project size, type and geographic distribution. This approach assures that we bring a fresh eye for scale, detail and landscape opportunity to each commission. It has also allowed us to develop an unusual depth of experience in a significant number of specialties. Our projects have ranged from university campus plans to historic garden restorations, from corporate headquarters to large urban developments, and from private residences to a new city in South Korea.

SERVICES

Towers|Golde has earned a strong reputation for excellence in providing full professional services in a number of specialized areas:
