

**STOCKBRIDGE DISTRICT LANDSCAPE
UNIVERSITY OF MASSACHUSETTS
AMHERST**

In planning the redesign of Phase I this 12 acre pedestrian precinct at the historic core of the UMass campus, T|G created a memorable place that enhances the experience and image of the University. It will encourage both social engagement and emotional connection with the regional landscape, with the history of the institution, and with the missions of the visual arts and sciences facilities that dominate the precinct. Key to the success of the project was careful vetting through a broad community constituency.

The expansion of the University Arboretum, the agrarian history of the institution, and the need for multi-use event space dictates the design and vocabulary of this new pedestrian destination on campus. Emergency and service access, handicapped accessibility, and interim parking are also important components of the plan.

CLIENT	<i>University of Massachusetts</i>
LOCATION	<i>Amherst, Massachusetts</i>
PROJECT AREA	<i>12 acres</i>
STATUS	<i>Preliminary design complete 2009</i>
PROJECT COST	<i>\$3 million, Phase I</i>
