Towers|Golde's Demonstration Green Roof

Towers|Golde's demonstration green roof, located on the canopy over our office entry, is emblematic of our commitment to sustainable building practices and serves as an experimental laboratory for our exploration of extensive green roof technology and the world of rooftop plant species. Although it is only 100 square feet in area, we have been able to create a green roof lab where we can observe the development and adaptability of six to nine plant species at any one time, ranging from grasses to perennial flowers to bulbs and ground covers.

Plant Palette

- *Allium 'Mount Sinai'*
- Mt. Sinai Chives
- *Aster cordifolius*
- Blue Wood Aster
(*Symphyotrichum cordifolium*)
- *Calamagrostis brachytricha*
- Korean Feather Reed Grass
